EDUCATION

Jesus Reigns Christian College

Malate, Manila

Bachelor of Science in Information Technology

June 2026

- Capstone: Development of an AI-Enhanced Bubble Curtain System for Automated River Waste Collection Monitoring
- Published in the International Journal of Research and Scientific Innovation (IJRSI), June 2026 — rsisinternational.org/journals/ijrsi/view/development-of-an-ai-enhanced-bubble-curtain-system

EXPERIENCE

Arko (ArkoDev PH)

Remote

Freelance Developer; ARKO Internal Operations System

Aug 2026 to Present

- Collaborated in a four-person team to build an internal enterprise operations platform (finance, tasks, CRM, and AI assistant) using Next.js 15, React 19, tRPC, Prisma, and PostgreSQL in a Turborepo monorepo
- Built parts of the unified operations dashboard, including real-time metrics and financial performance views, and contributed ideas to the overall dashboard design
- Fixed a responsive sidebar layout bug affecting smaller screens and high browser zoom levels, and built a collapsible sidebar with persisted state
- Built a cross-platform Python setup script that verifies dependencies and launches the monorepo with one command

Hiraya Technology Solutions

Quezon City

Backend Developer Intern

Sept 2025 to Dec 2025

- Designed and maintained secure RESTful APIs, improving system reliability and performance
- Optimized database queries, reducing data processing time and improving efficiency
- Implemented backend solutions that supported a scalable and maintainable system architecture

Data Analyst Intern

Sept 2025 to Dec 2025

- Analyzed data using Python, SQL, and Jupyter Notebooks to support business decisions
- Processed and visualized datasets, delivering actionable insights to improve workflows
- Maintained data integrity and accuracy across large datasets used for reporting

Deutsche Business Solutions

Makati City

Service Desk Team and Field Support Team Intern

Jan 2026 to Mar 2026

- Supported the Service Desk team in providing remote-access technical support to clients using ServiceNow
- Explored the NAMOS point-of-sale system and how its transactions are processed

PROJECTS

AI Data Analyst Agent (Visiq)

Python, FastAPI, React, Pandas, Gemini

github.com/ralphrowel/AI_Data_Analyst_Agent | ai-data-analyst-agent-silk.vercel.app

- Built a web app that answers plain-English questions about a CSV dataset (Netflix titles, Kaggle) using LLM-generated query plans
- Executed query plans with Pandas and returned results as tables and charts

Data Quality & Cleaning Platform

Python, Django REST Framework, React, PostgreSQL, Docker

github.com/ralphrowel/Data-Quality-and-Cleaning-Platform

- Built a platform that ingests CSV and Excel files, profiles them, and detects data-quality issues such as missing values, duplicates, invalid values, and formatting problems
- Designed a deterministic cleaning pipeline that normalizes, validates, and type-converts data, producing versioned datasets (raw to cleaned) rather than overwriting the original
- Generated quality reports with a composite data quality score for downstream use in Power BI
- Containerized the full stack with Docker Compose (Gunicorn/Django, Nginx-served React, PostgreSQL) with health checks and persistent volumes, backed by 63 passing tests

SKILLS

Languages: Python, PHP, JavaScript, SQL

Frameworks and Libraries: Django REST Framework, FastAPI, React, Vite, Tailwind CSS, Pandas, NumPy, Matplotlib, Seaborn

Databases: PostgreSQL, MySQL

Tools: Git/GitHub, Docker, Jupyter Notebook, ServiceNow, JWT Authentication
